

CP Series Epoxy Primer

The CP Series Epoxy Primer is a high-performance, 100% volume solids, solvent-free, two-component epoxy coating specifically engineered for the corrosion protection of steel pipelines. This epoxy primer offers outstanding anti-corrosion properties, effectively resisting cathodic disbondment, as well as impact and abrasion from sand and stone.

It can be used on its own for durable protection against a wide range of chemical attacks, or in combination with heat shrinkable sleeves to provide enhanced protection for metal pipelines.

■ KEY FEATURES

1. Excellent multifunctional adhesive to 3LPE and FBE
2. Superior cathodic disbondment resistance
3. Excellent electric insulation properties
4. Durable protection against various chemical attacks
5. Good resistance to abrasion from sand and stone

■ ORDERING INFORMATION

Epoxy Primer Kit : CP-1-KIT-150-0.75sqm

This kit includes measured quantities of Epoxy resin and Curing agent, a stirring stick, a brush.

This kit contains sufficient primer for 0.75sqm of coverage.

Bulk Epoxy:

Epoxy : CP-1-PART-A-18L-25KG

■ APPLICATION STEPS

1. Prepare the pipe surface
2. Pour curing agent into base
3. Stir and mixture the agent with base
4. Ensure a homogeneous mixture
5. Apply mixed epoxy primer
