BASENNOVA

PRODUCT DATA SHEET

Marine Stern Shaft Grounding System Accessories

Marine Stern Shaft Grounding System is a core anti-corrosion device in ship propulsion systems, designed to eliminate electrical potential differences between the shaftline and hull. It prevents electrostatic corrosion and stray current corrosion on critical components including:Millivoltmeter,Slip Ring , Brush,Brush Holder,Brush Rigging and Cable.

Millivoltmeter: Range: 0~250 mV; Alarm threshold: >80 mV

Slip Ring: Alloy silver ring; Contact resistance ≤0.01 Ω

Brush: Silver-impregnated graphite; Oil/corrosion resistant

Brush Holder: Silver-impregnated graphite; Oil/corrosion resistant

Brush Rigging: Dual-brush configuration; Insulated base

Cable: Cross-section ≥45 mm²; Direct hull connection
