

Self-Locking Nylon Ribbon Tie

Self-locking nylon ribbon tie (also known as wire harness tie / cable tie) is a general-purpose cable bundling and fixing consumable. It is integrally injection-molded from virgin PA66 nylon and features a ratchet one-way self-locking mechanism for rapid bundling and securing of wire harnesses, tubing, and objects. With advantages including high toughness, electrical insulation, flame retardancy, and easy installation, it is widely used across industries such as electrical, automotive, photovoltaic, mechanical equipment, and packaging logistics. It is a standardized general-purpose cable management accessory available on the market.

KEY FEATURES

1. Self-locking & Easy Installation
2. High Strength & Toughness, Resistant to Breakage
3. Strong Weather Resistance & Wide Applicability
4. Insulating & Flame Retardant, Safe & Reliable
5. Smooth Surface, Gentle on Hands & Cables

PRODUCT SPECIFICATIONS

Environmental Standard:Complies with National Grade A / ROHS

Color:Natural (white) / Black

Packaging Specifications:100/500/1000pcs/bag

PRODUCT GUIDE

Specification (W×L)/mm	Max. Bundle Diameter/mm	Tensile Strength/N	Recommended Applications
2.5×100	22	80	Home cable management, inside electronic devices
2.5×150	36	80	Computer cases, household appliance wiring
3.6×200	50	178	Industrial control cabinets, automotive wiring harnesses
4.8×300	80	220	Distribution cabinets, photovoltaic cables
8.8×500	145	670	Heavy-duty wiring harnesses, pipe bundling
