

## Well Base

The well base in the cathodic protection system is a key load-bearing and sealing component installed on the top of the test well. It is mainly used to fix the well cover, prevent the intrusion of the external environment, and ensure the long-term stable operation of the test equipment.

### ■ PRODUCT SPECIFICATIONS

**Material:** Carbon steel

**Product Structure:** Flange

**Surface Treatment:** Plastic spraying (yellow)

**Compressive Strength:** 200 MPa or higher

**Service Life:** 15-20years

**Product Size:** Can be customized

### ■ APPLICATIONS

Deep anode protection project
